Effe has spent over 35 years perfecting your spa.

WELLNESS 35 Y EXPERIENCE

Effe products are designed and manufactured in-house, following a production process that ensures every detail is meticulously taken care of, delivering consistently flawless results to the customer. There is a close, deep-rooted connection between space and personal wellbeing. Materials, reflected light, temperatures, fragrances and sounds must convey positive feelings and emotions. Whether you have a public or private spa, customising this haven of calm and relaxation will ensure greater benefits for the mind and body.

Custom-made spa projects

Effe products can be adapted to fit any space: create your own personal wellbeing area, tailor-made to make the very best use of the environment.
Effe can produce completely customised projects, which include the combination of saunas, Hammams, relaxation zones, sensorial baths and showers to create your perfect spa.

Eco–friendly and smart technology

Effe's production process is designed to optimise energy consumption from start to finish. Its state-of-the-art technological solutions ensure all Effe products are long-lasting and energy-saving, their quality is certified and they require very little maintenance.

ENERGY SAVING

THE TEMPERATURE CONTROL PROBES REGULATE THE EMISSION OF THE STEAM TO ENSURE MAXIMUM COMFORT AT ALL TIMES.

THE ON/OFF PERIODS OF THE HEATING ELEMENTS ARE EVENLY SPACED.

NO WATER WASTE

DILUTION AND INTERMEDIATE RINSING ARE BASED ON ACTUAL REQUIREMENTS.

THE BOILER IS AUTOMATICALLY FILLED WHEN REQUIRED.

THE TIME REQUIRED TO FILL AND DRAIN WATER IS CONSTANTLY MONITORED.

COMPLIANCE WITH ANTI-POLLUTION PLUMBING REQUIREMENTS.

USE OF ECO-FRIENDLY MATERIALS

IN ORDER TO SAFEGUARD THE ENVIRONMENT, EFFE STATES THAT THE TIMBER USED IN THE PRODUCTION OF FINNISH SAUNAS IS COMPLIANT WITH THE STANDARDS PEFC ITA 1002 REV. 4, FSC-STD-40-0003 V1-0 AND FSC-STD-40-004 V2-0.

EFFE PRODUCTS DO NOT CONTAIN ANY TIMBER RESULTING FROM DEFORESTATION OR WOOD FROM TREES AT RISK OF EXTINCTION.

ELECTRONIC SELF-CONFIGURATION

AUTOMATIC START-UP: THANKS TO SOPHISTICATED ELECTRONICS, START-UP IS QUICK AND THERE IS NO NEED FOR MANUAL PROCEDURES.

THE SYSTEM AUTOMATICALLY RECOGNISES ANY CONNECTED DEVICES (COLOUR THERAPY LAMP, CONTROL PANEL ETC.).

EASY TO INSTALL

THE CASING IS DESIGNED FOR EASY INSTALLATION.

A SPECIAL TOP COVER IS FITTED ON ALL THE INTERNAL GENERATORS TO PREVENT DRIPPING.

THE CASING AND INTERNAL GENERATORS ARE PERFECTLY WATERTIGHT.

PERFECT STEAM

POWER STEAM FUNCTION (PSF) FITTED AS STANDARD: A SPECIAL VENTILATION SYSTEM THAT AVOIDS TEMPERATURE DIFFERENCES INSIDE THE HAMMAM CUBICLE.

ADJUSTABLE BLADES TO VARY STEAM FLOW DIRECTION; ADJUSTABLE FAN SPEED; LED LIGHTING ILLUMINATES THE STEAM OUTLET.

TWO TEMPERATURE PROBES ARE LOCATED INSIDE THE STEAM DIFFUSER.

SUPER SILENT STEAM: SILENT STEAM GENERATION.

BETTER MAINTENANCE

THE SYSTEM IS ABLE TO DETECT AND SIGNAL MALFUNCTIONS IN THE HEATING ELEMENTS AND PROBE.

SELF-DIAGNOSIS: IN THE EVENT OF A FAULT, THE SYSTEM UNBLOCKS THE VALVES.

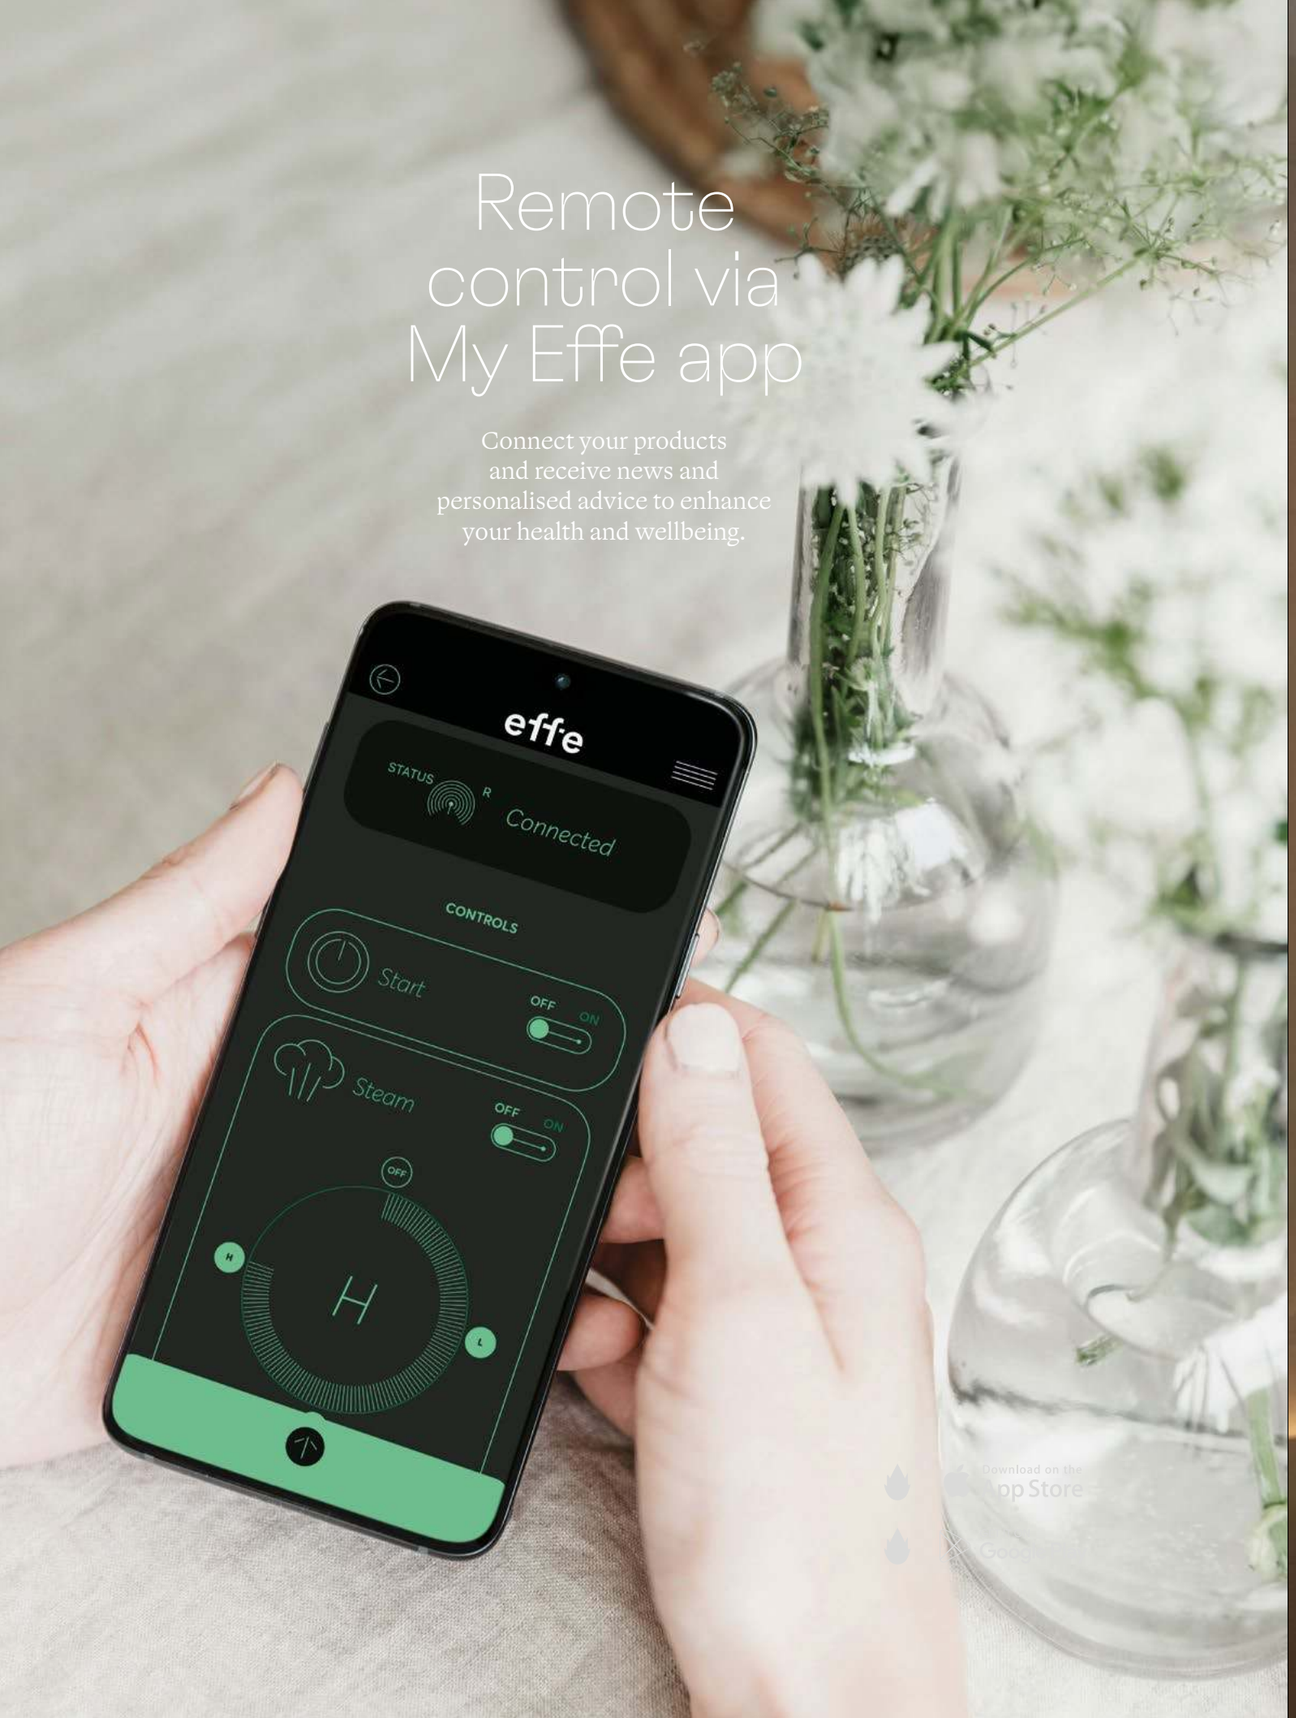

SMART DESCALING

IT AUTOMATICALLY CHECKS FOR AND REDUCES ISSUES CAUSED BY THE BUILD-UP OF LIME-SCALE AND OTHER SUBSTANCES IN THE WATER.

FINAL AUTOMATIC RINSING TAKES PLACE 30 MINUTES AFTER THE END OF THE HAMMAM SESSION WITH INITIAL DILUTION WITH COLD WATER.

Remote control via My Effe app

Connect your products and receive news and personalised advice to enhance your health and wellbeing.

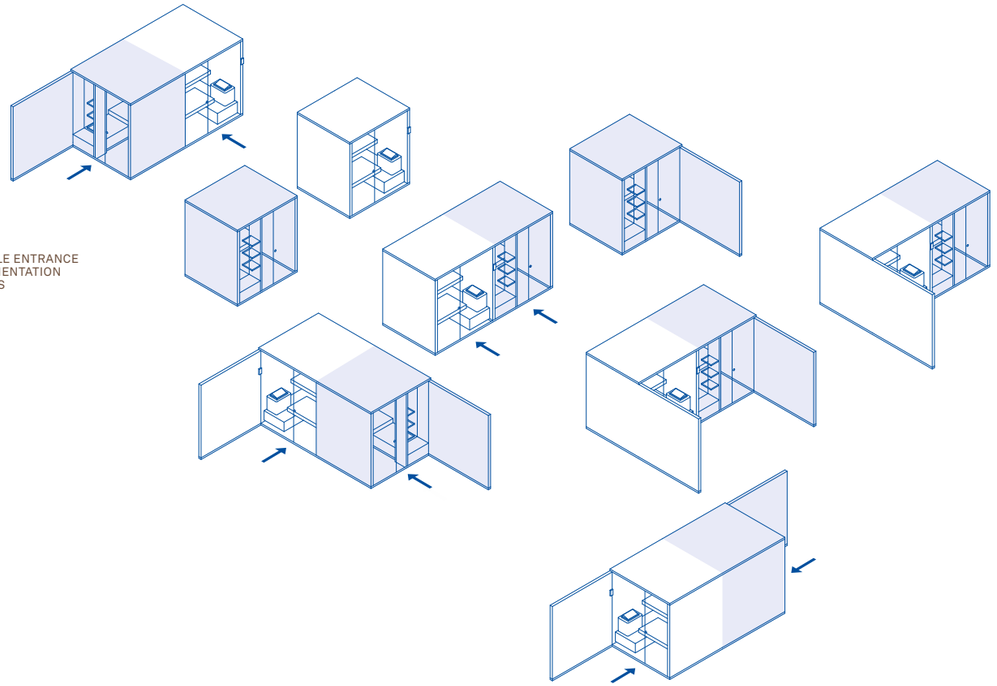

Effe Sound System

You can listen to your favourite music inside the sauna or hammam using a Bluetooth connection and your own device.
The Effe Sound System (ESS), which features two stereo speakers, connects to the internal speaker automatically, without the need for additional software or setting up special connections.

Logica Plus represents the latest evolution of the Logica product line, combining sauna, hammam, and shower in a single environment (inthe Spa version). Its elegant, minimalist design features a lightweight aluminium frame and cladding in premium materials such as porcelain stoneware and thermally treated Aspen, creating a warm and welcoming atmosphere. Distinctive elements include the mirrors, which connect the spaces horizontally, as well as the glass wall separating the sauna and hammam, fostering a sense of continuity and expanding the perception of space.

Yoku is a highly versatile modular system, ideal for both residential and public spaces. Its design is characterised by the extensive use of wood and three distinct front panel options: Shelf, Glass, and Door. The Shelf option features a customisable bookcase module that creates a visual filter between the interior and exterior spaces, fostering a more intimate and well-being-oriented experience. The Door option includes a full-height wooden door with a handle, evoking a traditional aesthetic. The Glass option offers a minimalist and luminous design, thanks to its entirely glazed front panel.

YOKU SPA SHELF

In the Shelf version, the front becomes a large open “bookcase” with steel shelving. It acts as a natural filter and holds objects, books and fabrics, creating a highly personalised look and connecting with the spa surroundings.

YOKU SPA DOOR

In the Door version, the large wooden door surface reflects the design of a traditional enclosed and protected sauna. The full-height handle becomes a refined and functional design feature.

YOKU SPA GLASS

The Glass version conveys a strong sense of transparency and brightness. Its clean, minimalist design highlights the product’s style details, such as the recessed glass panels framed by 20 cm wooden borders.

Natural is the collection by Marco Williams Fagioli dedicated to the three heat therapies: sauna, hammam, and infrared. The cohesive aesthetic of the products, crafted from premium thermally treated Aspen wood, combined with their compact dimensions, ensures seamless integration even within residential settings. The collection's design prioritises spatial ergonomics whilst delivering significant energy savings, thanks to its optimised and reduced volume.

This project by Rodolfo Dordoni captures the authentic spirit of the traditional Finnish sauna, which in its country of origin is conceived as a standalone structure, separate from the home and harmoniously integrated with nature. Cabanon is designed to adapt to various settings: the Terrace version is compact and ideal for terraces or urban penthouses thanks to its contained dimensions, and the Garden version is designed for larger spaces, with the option of incorporating a small outdoor relaxation area.

With the Aladdin project, Rodolfo Dordoni created an iconic design in which premium materials and flawless craftsmanship come together to redefine the concept of the sauna. Smooth surfaces are paired with softly contoured benches, whilst the mirror-clad lower section fascia creates a visual effect of great depth and lightness. Considered details, such as the optional porcelain stoneware platform and the stove with an anodised aluminium cover, further enhance the elegance of the design.

Air is a sauna that displays an original and contemporary design, defined by its suspended seating and symmetrical lines, with the stove positioned at its centre. Its defining feature is its lightness. In the Air 120 version, the arrangement of the benches around the stove promotes socialisation, evoking the traditional conception of the sauna. The large 10 mm tempered glass window incorporates light as a key design element, enhancing its sense of openness and wellbeing.

Sky and Sky Corner blur the boundaries between the product and its surroundings:
light filters through the expansive glass surfaces, creating a truly unique sauna experience. Designer Giovanna Talocci has achieved a perfect balance between tradition and modernity, making this product highly adaptable even for living areas, where it becomes a rational and elegant design element.

The Kanso line of saunas (from the Japanese for “simplicity-purity”) is defined by its rhythmic, modular design that instils an immediate sense of tranquillity. The frames that characterise the walls create a light, harmonious aesthetic that blends seamlessly with the warmth of Aspen wood and thermally treated timbers. Crafted from natural materials employing environmentally conscious processes, Kanso is a true expression of a sustainable lifestyle.

AUKI 40	189	126	201
AUKI 30	128	126	201

Auki represents a tribute to Nordic tradition.
The purity of this classic ritual is enhanced by the intimate feel of the wide wooden surfaces and the verticality emphasised by the slatted design, with cladding also available in knotty Spruce.
Auki combines innovative design elements, such as the handle which is seamlessly integrated into the front wall, full-height glass panels, and a brushed steel control panel.

Idea is the collection designed by Giovanna Talocci, featuring both sauna and infrared cabins. Clean lines with a nod to Nordic tradition paired with refined details, are the defininig features of a product with a classic design and contemporary appeal. The external frame with an angled inset adds depth to the collection's products, even in its more compact viariations.

DESIGN PLUS

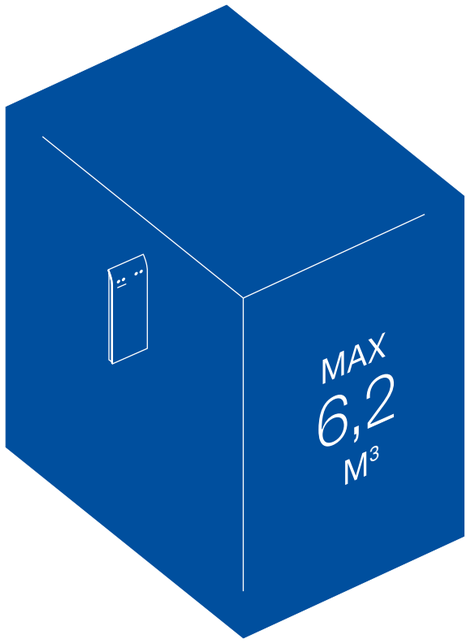

MENZIONE D'ONORE
COMPASSO D'ORO ADI

Touch&Steam Smart is a professional steam generator with an elegant and compact design, in which the only visible component is a simple screen-printed, tempered glass panel, with an overall thickness of just 3.7 cm. Versatile and easy to use, it seamlessly integrates into any hammam, from home showers to public spas. It includes chromotherapy, aromatherapy, and sound diffusion by means of the Effe Sound System. The recessed boiler ensures a quick and discreet installation.

Easysteam Smart

Easysteam Smart is an elegant and compact steam generator that combines ease of installation, advanced technology, and user-friendly functionality. This generator can also be installed within the shower cabin, transforming it into a truly private hammam. Thanks to Effe technology, it delivers superior quality steam, ensuring hygiene as well as lime scale control. Maintenance is minimal, as the automatic boiler cleaning system reduces lime scale build-up, ensuring long-lasting performance.

CAMOUFLAGE VERSION:
MAX THICKNESS OF
CLADDING 13 MM

Inside is a internal steam generator which incorporates the very best in technology, functionality and aesthetics. The Glass version, with its white glass panel, is stylish and discreet, with colours and graphics that can be personalised with silk-screen printing. Conversely, in the Camouflage version the front panel can be clad in the same finish as the interior, so the steam generator becomes almost invisible and the design crisp and sleek.

Organic fragrances for saunas and Hammams inspired by the force of nature.

Remedia has created an exclusive range of sauna and Hammam fragrances for Effe which heighten the benefits of these ancient rituals thanks to their olfactory and almost dreamlike effect. Remedia uses only natural organic products that are grown and processed according to ancient traditions of alchemical herbalism.

Water.

Fluidity,
Balance,
Harmony.

Joy expresses the smile of sweet orange which nurtures life's pleasures. Its scented notes add rhythm to the sound of water, as simple and pure as lavender, and as crisp and clear as eucalyptus.

Water pampers us, it takes care of us, it connects us with magical feelings, it brings out the child in us. It helps us find peace and harmony. The ritual becomes a moment of profound peace.

Fire.

Passion,
Life force,
Immune system.

Citrus notes give space and passion to warm cardamom, accompanied by fearless juniper with its mellow, fortifying notes. Sweet cinnamon is irresistible, warming and healing us like the sun.

Fire is energy, pure life celebrated with passion and strength. The whole body is realigned and energised. This ritual gives us renewed energy and stimulates our life force, with benefits for the immune system.

Earth.

Roots,
Physical body,
Centring,
Presence.

Intense, profound notes of vetiver and cedar envelop the body and celebrate its sacred being. Soothing patchouli calms the mind and imparts sensuality, complementing the sweetness of benzoin and coriander.

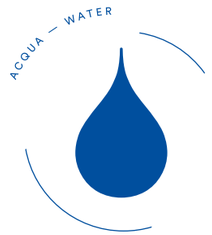

Earth accompanies us as we explore the sacred nature of the body and enhances the ritual of the sauna or steam bath when we have forgotten our physical presence. It helps reconnect us with the needs of our body and its true messages.

Air.

Thought,
Spaciousness,
Breath,
Lightness.

The sound of litsea comes from afar, fresh and regenerating like the wind that chases away dark storm clouds. The balsamic effect of bay accentuates these notes and restores purity to the mind, accompanied by refreshing mint.

Air purifies the overloaded mind, freeing it, unburdening it.
It lightens the weight of our thoughts and supports the breath. The ritual regenerates us and opens our mind to new perspectives.
